

36TH NATIONAL STATISTICS MONTH

RECTO MEMORIAL NATIONAL HIGH SCHOOL

DAY 1

MATHEMATICS DEPARTMENT

SYMPOSIUM

OCTOBER 10, 2025

In celebration of the 36th National Statistics Month (NSM), a symposium was conducted on Day 1 of the week-long observance with the theme “Accelerating the SDG Pace of Progress: Mobilizing Data for All.” The activity aimed to deepen the participants’ understanding of the importance of statistics in achieving the Sustainable Development Goals (SDGs) and to highlight the role of data in promoting inclusive and sustainable growth.

The session began with an opening program that welcomed all participants, including students, teachers, and invited guests. The opening remarks emphasized the relevance of statistics in today’s data-driven society and the crucial part it plays in policy-making, research, and development planning.

ACCELERATING THE SDG PACE OF PROGRESS: MOBILIZING DATA FOR ALL

“Every piece of data tells a story – even something as simple as knowing what students love to learn and eat.” –

The resource speaker, Mr. Carmilo Fernando, delivered an insightful presentation about the theme. He discussed how mobilizing accurate and timely data can help monitor and accelerate progress toward the SDGs. He also emphasized the importance of data literacy among students and educators, encouraging everyone to use data responsibly in addressing local and global challenges.

Throughout the symposium, participants actively engaged in discussions and asked meaningful questions about real-world applications of statistical data. To make the session more interactive and enjoyable, Mr. Carmilo conducted

a fun activity entitled “*Family Feud*” for all the participants. He asked the students about their most favored subject and the most preferred snack to eat. The students enthusiastically participated and were very active throughout the game. During the activity, Mr. Carmilo shared that he had surveyed 100 respondents in Recto MNHS to obtain valid results for his questions, effectively demonstrating how data collection and analysis are applied in real-life situations. The engaging activity not only brought excitement to the symposium but also helped the participants better understand the practical use of statistics.

Before the program ended, Mr. Carmilo Fernando was awarded a Certificate of Recognition in appreciation of his time, effort, and valuable insights shared during the symposium. His contribution greatly enriched the participants’ understanding of the significance of statistics in achieving sustainable development.

The talk inspired many to appreciate the value of statistics beyond the classroom and to view it as an essential tool for societal development. The event concluded with a synthesis and closing message highlighting the significance of continuous learning and collaboration in promoting the use of quality data for sustainable progress.

Overall, the symposium successfully marked the beginning of the 36th National Statistics Month Celebration. It served as an eye-opener for the participants, fostering awareness of the powerful role of statistics in shaping a better, data-informed future for all.

GROUP QUIZ BEE

● OCTOBER 13, 2025

Recto Memorial National High School Celebrates National Statistics Month with Math-Themed Activities

In line with Proclamation No. 647 issued by the Office of the President, Recto Memorial National High School proudly joins the nationwide celebration of National Statistics Month every October. This annual observance serves as an opportunity to promote mathematical and statistical literacy not only among students but also within the broader community.

This year, the school marked the celebration with a variety of meaningful and engaging activities, including classroom-based events, a symposium, and a Finite Art exhibit. These activities aimed to make mathematics more accessible and enjoyable by highlighting its practical relevance in everyday life.

One of the highlights of the celebration was the Classroom-Based Math Quiz Bee, held on October 13, 2025, and participated in by all Junior High School students. The quiz bee was designed to challenge students to think critically, solve problems efficiently, and work under time constraints—skills that are essential not only in mathematics but also in real-world scenarios.

GROUP QUIZ BEE

● OCTOBER 13, 2025

Recto Memorial National High School Celebrates National Statistics Month with Math-Themed Activities

The competition was structured into three rounds of increasing difficulty:

- Easy Round: 6 questions, 1 point each
- Average Round: 3 questions, 3 points each
- Difficult Round: 3 questions, 5 points each

Through this friendly competition, students had the chance to strengthen their analytical and logical reasoning skills while fostering a spirit of healthy academic challenge.

With active participation and enthusiasm from both students and teachers, the celebration of National Statistics Month at Recto Memorial National High School was a resounding success—promoting a deeper appreciation for mathematics across the school community.

POSTER MAKING

● OCTOBER 14, 2025

Day 3 Highlight: Poster-Making Contest Showcases Student Creativity and Collaboration

On October 14, 2025, Day 3 of the 36th National Statistics Month (NSM) Celebration at Recto Memorial National High School featured a classroom-based group poster-making contest—a creative break from the usual computational activities in mathematics.

This activity allowed students to visually interpret and represent mathematical and statistical concepts, helping transform abstract ideas into more concrete, understandable forms. By designing posters, students were encouraged to think critically and creatively about how to communicate complex ideas clearly and effectively.

Participants enthusiastically embraced the opportunity to showcase their artistic talents and teamwork. The contest also strengthened their collaboration skills as they worked together to create posters aligned with this year's NSM theme: "Accelerating the SDG Pace of Progress: Mobilizing the Data for All."

More than just a contest, the activity emphasized the importance of statistics in achieving sustainable development goals, while allowing students to reflect on how data and mathematics impact society.

POSTER MAKING

● OCTOBER 14, 2025

The poster-making contest, along with other engaging events such as the math quiz bee, symposiums, and Finite Art exhibit, formed part of the school's dynamic observance of National Statistics Month. These activities not only promote mathematical literacy, but also celebrate the beauty of math, encourage critical thinking, and demonstrate the real-world relevance of mathematical knowledge.

Overall, the celebration was a success. Both students and teachers of Recto Memorial National High School expressed their appreciation for the week's activities and gained a deeper understanding of the vital role that mathematics and statistics play in daily life.

FINITE ART EXHIBIT

OCTOBER 8, 2025

Finite Art Exhibit: Discovering the Beauty of Mathematics Through Art

The Finite Art Exhibit invites viewers to explore the creative side of Mathematics, proving it's more than just numbers and equations. The exhibit celebrates the presence of mathematical concepts in everyday life—through patterns, shapes, lines, and artistic design.

Showcasing the talents of Grade 11 students from the Engineering cluster, the exhibit features artworks inspired by key mathematical principles such as tessellation, the golden ratio, symmetry, and frieze patterns. Each piece reflects a deep connection between math and visual expression.

Organized by Ma'am Elizabeth Lalunio and the RMNHS Statistics and Mathematics Society, the event proudly saw participation from 233 students, turning numbers into masterpieces.
